

EndNote

Getting It and Using with PubMed

Getting EndNote

The OSU Library has purchased EndNote and has made it available for free to all OSU students, faculty, and staff. The bibliographic software may be installed on a campus computer, as well as on a laptop or home computer. **The total number of installed copies per registered user must not exceed two.**

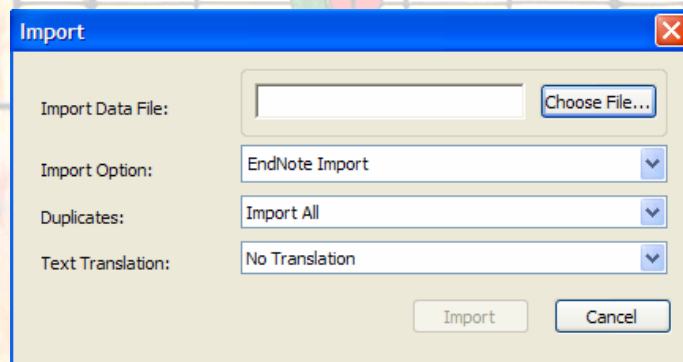

EndNote may be downloaded from <http://www.library.okstate.edu/bibmanager/index.htm>, or a CD is available from Digital Library Services in the Edmon Low Library or the Veterinary Medicine Library in McElroy Hall.

Importing Search Results

1. Execute your search within the PubMed.
2. Mark desired citations.

3. In the “display” menu, select the “MEDLINE” format. (Note: the default format is “summary”)
4. In the “show” menu, choose a number large enough to show all of your marked citations.
5. Once the “items” are displayed in MEDLINE format, select “File” from the drop-down menu that by default will show “Send to.” (Note: This opens a new window)
6. Save the results in the new window as a text (*.txt) file. (Note: Remember where you save this file)
7. Open EndNote and then open the EndNote library you want to import your citations into.
8. From “File” menu, select “Import”.

9. In the Import dialog box, use the “Choose File” button to select the text file you saved from PubMed.
10. In the “Import Option” box, select the “PubMed (NLM)” filter. (Note: if the “PubMed (NLM)” filter is not among your choices in the popup menu, the select “Other Filters” to open the complete list of filters. Select “PubMed (NLM)” and click on “Choose”)
11. Select what to do with duplicate citations and leave the “Text Translation” box at “No Translation.”
12. Click on Import (Note: If only one citation appears and you were importing more than one, or if the import box flashes on the screen but no citations are imported, then the import did not work. Please contact Digital Library Services at 405.744.6191 or your librarian for help.
